

Role-Based Access
Control; how to create a
user account. By Bryan
Ortega

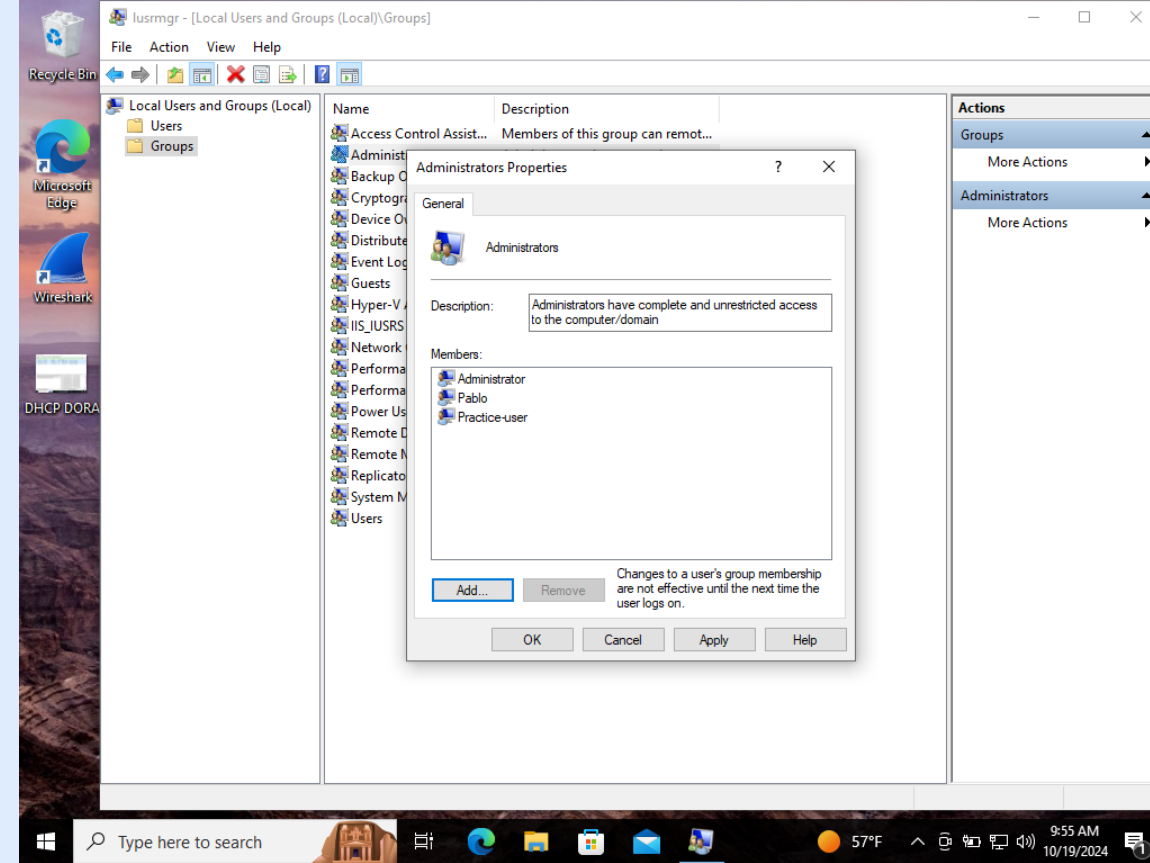

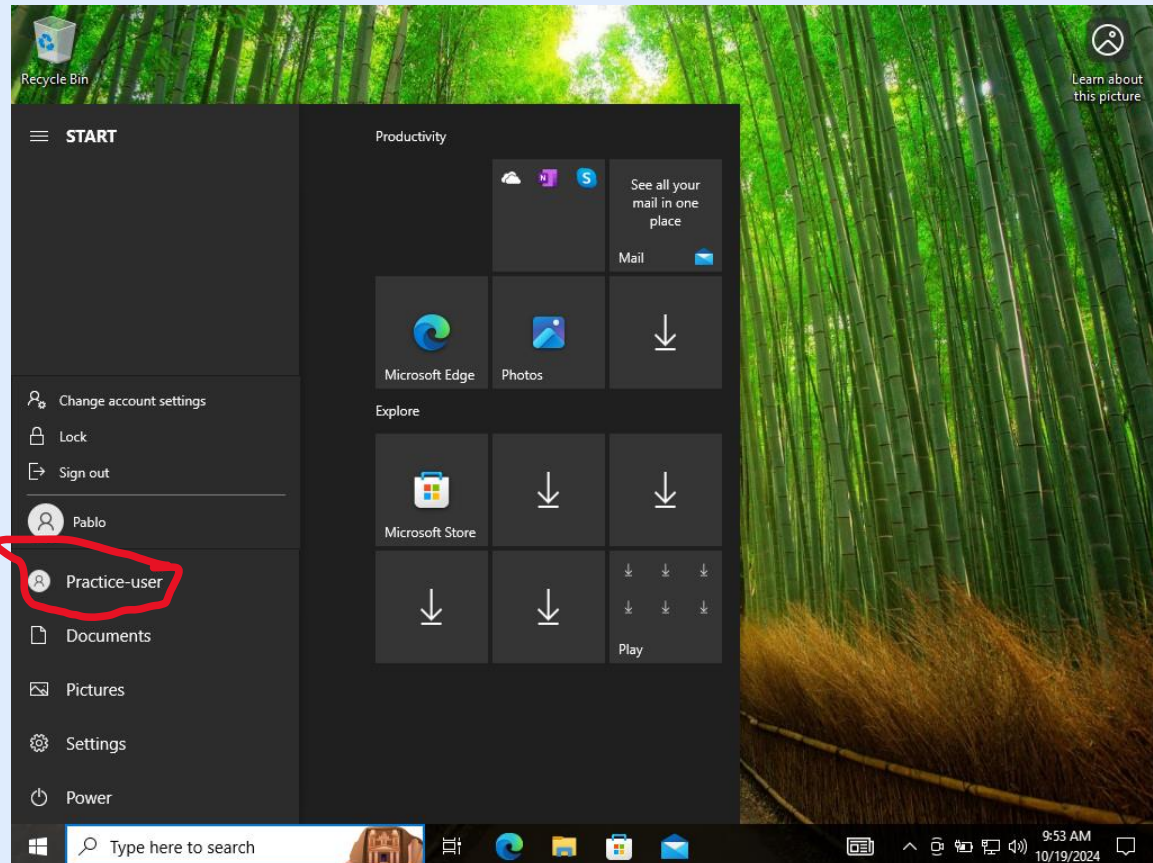

Step 1

- Type Windows key + R and type lusrmgr.msc to open the Local Users and Groups snap-in.
- Click on user, click the screen and press new user. Create a username and password.

STEP 2

- Click create.
- That's it, you created a new user!

ADDING RBAC TO NEW USERS

- Go back to the administrator account, press windows key +R, type `lusrmgr.msc` and press enter
- Once there, click `groups>administrators>add`. Enter the name of the new user and click on check names and press ok.
- Now your new user have administration access.
